

As an important partner in the region, department and country, ECO ORO MINERALS CORP defines its social policy as one that emphasizes the well-being of neighbouring communities. In return, the company receives recognition for its contribution to and participation in the progress of society as a whole.

The commitment to “Desarrollo Sostenible” (Sustainable Development) is an integral part of ECO ORO’s business plan, as it provides a competitive edge and brings the company closer to achieving mid- to long-term goals. The three elements that make up “Desarrollo Sostenible” involve environmental, social and economic issues, all of which overlap and result in the sustainability of our business. The following diagram illustrates how each element interacts with the others, reflecting ECO ORO’s policy:

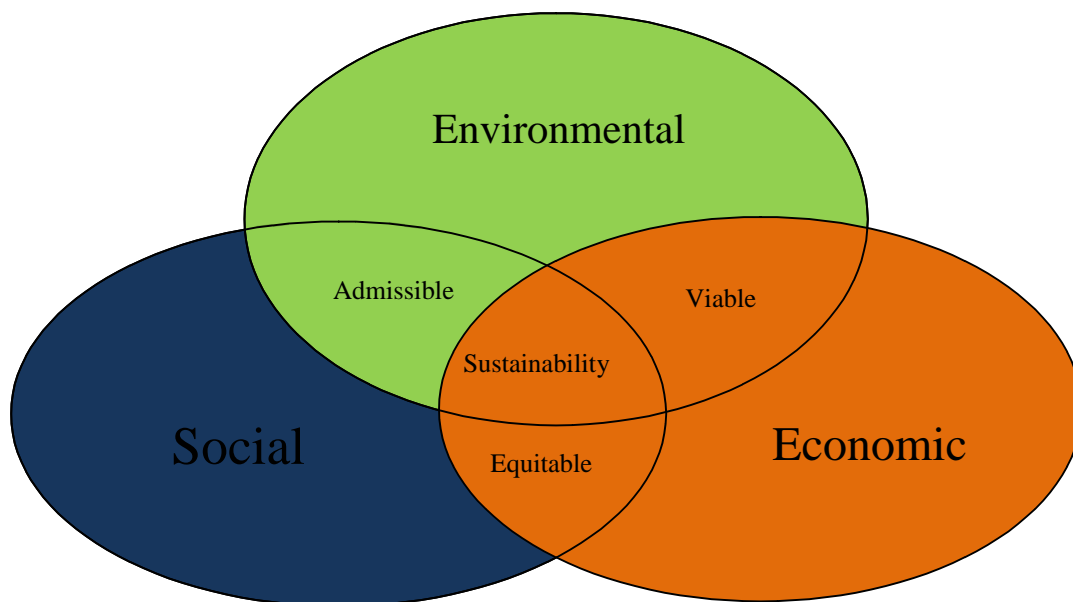

Figure 21. ECO ORO Model of Sustainability

The management of ECO ORO is based on ethics, transparency and respect for human rights. Through constant dialogue with stakeholders (both internal and external), the company builds trust and cooperation to create a healthy, equitable community.
